

数据库实验报告

姓名：李宗杭 学号：2311451 学院：软件学院

实验日期：2025.3.14 星期五 7-8 节

实验题目：创建数据库&导入数据集

一、实验内容

- 1、创建新用户并给与权限
- 2、创建新连接、创建数据库并导入文件
- 3、执行简单查询语句
- 4、练习

二、实现方法

- 1、创建新用户并给予权限

Local instanceMySQL80 → Administration → Users and Privileges

起名字，设密码，权限设为%

- 2、创建新连接、创建数据库并导入文件

通过 workbench 主页的+创建新连接，起名字，用户为新用户，默认为 sys

在新连接中创建新数据库，起名字，default collation 设为 utf8_bin

将新连接的默认库改为新建的库

创建新 tab 以执行查询语句，执行如图测试语句

```
1 • create table stu(  
2   id varchar(18), name varchar(18), age int);  
3 • insert into stu  
4   values('123','xiaoming',18);  
5 • select * from stu;
```

Result Grid | Filter Rows: | Export: | Wrap Cell Content: |

	id	name	age
▶	123	xiaoming	18

使用脚本导入第一个文件以创建一系列表，并执行如图测试语句

```
1 • select ID,name,dept_name from instructor
```

Result Grid			
ID	name	dept_name	
14365	Lembr	Accounting	
15347	Bawa	Athletics	
16807	Yazdi	Athletics	
10268	Wieland	Dept Sci	

导入第二个文件以插入数据

3、执行如下查询语句

```
1 SELECT * FROM department;
2 • select dept_name, budget from department;
3 • select * from student where dept_name='History'
```

4、分别通过代码和可视化的方法创建员工表

Query 1 employee1 - Table

Table Name: Schema: **dbscab2018**

Charset/Collation: Default Collation: Engine:

Comments:

Column Name	Datatype	PK	NN	UQ	B	UN	ZF	AI	G	Default/Expression
employee_id	INT	☒	☒	☐	☐	☐	☐	☒	☐	
name	VARCHAR(20)	☐	☒	☐	☐	☐	☐	☐	☐	
age	INT	☐	☐	☐	☐	☐	☐	☐	☐	
gender	ENUM('男', '女')	☐	☐	☐	☐	☐	☐	☐	☐	
contact_info	VARCHAR(20)	☐	☐	☐	☐	☐	☐	☐	☐	
hire_date	DATE	☐	☐	☐	☐	☐	☐	☐	☐	
salary	DECIMAL(10,2)	☐	☐	☐	☐	☐	☐	☐	☐	

Query 1 x employee1 - Table

Limit to 1000 rows

```
1 • CREATE TABLE employee2 (
2     employee_id INT PRIMARY KEY AUTO_INCREMENT,
3     name VARCHAR(20) NOT NULL,
4     age INT,
5     gender ENUM('男', '女'),
6     contact_info VARCHAR(20),
7     hire_date DATE,
8     salary DECIMAL(10, 2)
9 );
```

三、结果展示

1、新用户

 newuserconTest001
Users and Privileges

User Accounts

User	From Host
mysql.infoschema	localhost
mysql.session	localhost
mysql.sys	localhost
newuserTest001	%
root	localhost

Details for account newuserTest001@%

Login Account Limits Administrative Roles Schema Privileges

Login Name: newuserTest001 You may create multiple accounts with the same name to connect from different hosts.

Authentication Type: Standard For the standard password and/or host based authentication, select 'Standard'.

Limit to Hosts Matching: % % and _ wildcards may be used

Password: ***** Type a password to reset it.

Consider using a password with 8 or more characters with mixed case letters, numbers and punctuation marks.

Confirm Password: ***** Enter password again to confirm.

Expire Password

2、创建新连接，用新用户登录，并将默认数据库设为 dbsc1ab2018

MySQL Connections

- Local instance MySQL80
- SqlTest
- newuserconTest001

Connection Name: newuserconTest001

Connection Remote Management System Profile

Connection Method: Standard (TCP/IP) Method to use to connect to the RDBMS

Parameters SSL Advanced

Hostname: 127.0.0.1 Port: 3306 Name or IP address of the server host - and TCP/IP port.

Username: newuserTest001 Name of the user to connect with.

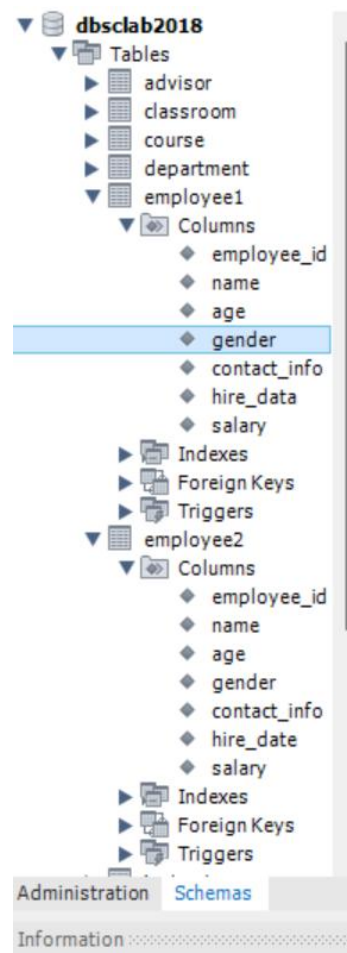

Password: Store in Vault ... Clear The user's password. Will be requested later if it's not set.

Default Schema: dbsc1ab2018 The schema to use as default schema. Leave blank to select it later.

3、查询语句输出

dept_name	building	budget	dept_name	budget	ID	name	dept_name	tot_cred
Accounting	Saucon	441840.92	Accounting	441840.92	10904	Jerns	History	21
Astronomy	Taylor	617253.94	Astronomy	617253.94	12069	Skeen	History	10
Athletics	Bronfman	734550.70	Athletics	734550.70	14023	Deshpande	History	90
Biology	Candlestick	647610.55	Biology	647610.55	14065	Starker	History	7
Civil Eng.	Chandler	255041.46	Civil Eng.	255041.46	1460	Martinsen	History	55
Comp. Sci.	Lamberton	106378.69	Comp. Sci.	106378.69	16543	Toffoli	History	83
Cybernetics	Mercer	794541.46	Cybernetics	794541.46	18941	Denecker	History	46
Elec. Eng.	Main	276527.61	Elec. Eng.	276527.61	19220	Hayashi	History	77

4、创建员工表

Column: gender

Collation: utf8mb3_bin

Definition:

gender enum('男','女')

四、结论

成功实现了实验任务，初步掌握 workbench 的使用方法，简要了解了 MySQL 语言的语法
